Meet the Packaging Challenges

T.Y.CHU & CO., LTD

While you are expert at your specialties, we are good in helping people to meet their packaging challenges. Having been in the packaging business for 30 years, we have helped many customers in cosmetics, perfumery, aromatic, personal care, homecare and pharmaceutical products, while each has unique packaging requirements and concerns. Packaging is the first thing people came into

contact with a product, it projects the product image, and it must be functional, sustainable and resistant to chemical and physical stress integral in the manufacturing, transportation and distribution processes. Product integrity must be preserved throughout the declared shelf life. In addition, there are regulatory concerns, chemical and product compatibility concerns, and most important of all, cost implications.

Over the years, we have gathered a wealth of knowledge in packaging. We understand how each kind of material works to serve your ends: glass, polymers, elastomer, metal and their enhancement techniques. We offer the optimal packaging solution that helps to differentiate your product from your competitors'.

Our development team can specify your packaging requirements in concise and simple language, in drawings, 2D/3D renderings, prototypes, pilot sampling in stages that are meant to be interactive with your involvement.

Agents & Distributors for
